Cost Tracking Module – Powerful Financial Management For Your IP

The Cost Tracking Module of CPA Memotech 2004 gives you financial visibility into your portfolios and automated management of your Intellectual Property (IP) related costs. This module works with CPA Memotech 2004 core modules (Patent, Design, Trademark, Licensing & Agreement, Domain Name) to handle all costs related to your IP activity.

It enables you to track, report, and identify all IP related costs and allocate appropriate expenses for each case so that you always have an accurate picture of your IP spending.

Invoice management

Input, store, track and identify incoming invoices. Allocate costs by IP case, country, supplier, status of procedure, nature of expense, department, cost center and other incremental measures. The flexibility of the module allows you to manage your incoming invoices the way that makes sense for your entire business.

Cost evaluation

View and evaluate actual and projected renewal costs for each case. View by country, agent, cost center, cost type and more.

Reporting

Generate reports and statistics in various formats. The software supports standard formats, such as Adobe® PDF and Microsoft® Word.

Multiple currency support

Accept incoming invoices in any currency. You may generate reports in up to three different currencies, including U.S. Dollars, Euros, or a third currency of reference. This option is very useful for international businesses that need to track costs globally. The module uses a built-in conversion table for accurate currency rates.

Deposit account

Follow IP-related transactions just like you do with on-line banking. If you hold an account with a national patent office, you can view all transactions processed by the office and cross-reference them against your incoming invoices.

Integration with accounting systems

Using our open technology, you can integrate IP costs into global accounting systems such as SAP®, Oracle Financial® and other third-party systems. Not only are you able to track transactions within your own department, but you are monitoring costs throughout the company, bringing added visibility to the value of IP.

About CPA Software Solutions

CPA Software Solutions, part of the CPA Group, is a leading provider of IP management software for companies and IP attorney firms worldwide. We deliver the most advanced, innovative and configurable solutions available, designed specifically to fit your individual needs.

Together with CPA, we provide more than 40,000 businesses with IP management software solutions; patent, design and trademark renewals; domain name management; and trademark searching and watching.
